fresh talk

After the flurry of peak periods it's good to welcome summer and in this issue of **fresh** we have enlisted the help of favourite floral designers Helen Jamieson from Great Britain and Anette Østergaard from Denmark. Both are bringing a fresh new look to gift and sports themed designs this summer, creating opportunities for super sales.

Congratulations to David Ragg and David Denyer of Lansdowne Florist, Bournemouth and David Ragg Flowers, Wimbourne who designed the Gold Medal winning Interflora exhibit at RHS Chelsea Flower Show. The theme of the exhibit was 'Progression,' and with the sponsored OASIS® Ideal Floral Foam Spheres they produced a pioneering design full of vibrancy and innovation.

David Ragg says, "Florists don't realize the potential of the OASIS® Ideal Floral Foam Spheres, in particular the new large Spheres (25cm and 35cm) that make such a powerful design statement for event work, displays and wedding tables. Everyone loved the hedgehog look of the smaller OASIS® SEC Dry Foam Spheres which were sprayed with brown OASIS® Spray Colour paint and spiked with Midelino Sticks. It was great to use such a versatile product."

The event of the year, Eurofleurs the European Cup competition for young florists, takes place from 20th to 23rd July, 2010. OASIS® Floral Products are proud to sponsor this prestigious competition that helps young floral designers reach their potential. For further information or for tickets log on to www.rhs.org.uk or www.britishfloristassociation.org

Helen Jamieson is one of England's most outstanding floral designers, a third generation florist whose grandfather started in the floral business as a grower and then as a trader in the local market. The business evolved into a flower shop thirty-five years ago, and when Helen decided floristry was her chosen career a second shop was opened in 1996. Flower Design of Rowlands Gill and Whickham, Newcastle upon Tyne www.flower-design.co.uk are thriving family businesses where attention to detail, customer service and stylish design are their recipes for success.

Trained mainly by her mother the well-known florist Gail Atkinson, Helen was a quick learner gaining her ICSF and NDSF qualifications before the age of twenty-five. No stranger to competition work Helen was Teleflorist Designer of the Year in 2007 and went on to compete in the Teleflor World Cup. Helen, a Chelsea Flower Show silver medalist, is also a valued Ambassador for OASIS® Floral Products where her innovative yet commercial designs make her an inspiring demonstrator and style consultant.

Helen's shop in Whickham is a contemporary beacon, with a colour scheme of sizzling cerise pink and black. Helen always has an unusual floral sculpture or installation in her shop window to draw the crowds plus a well-stocked flower and plant display outside.

With a huge wedding business together with gift and funeral trade Helen values the support that OASIS® Floral Products bring to her business, particularly the super strong

Helen Jamieson

and versatile OASIS® NAYLORBASE® range and her favourite at the moment, the new OASIS® Pedestal Block which is great for large-scale designs. Helen's says, "My style of

work is constantly evolving, my signature designs are simple and natural with emphasis on form and colour. I have to strike a balance between high design and the needs of my customers to ensure the business is focused on sales and profit."

Anette Østergaard is one of the most respected designers in Denmark with twenty years of experience in floral design. After an apprenticeship in floristry

Anette started her own shop, but here she missed the creativity that freelance work could give her, so eventually she gave up the shop to concentrate on specific aspects of design and developing her own in built style as an artist with flowers. Her freelance company specializes in unique designs for individual customers and her style is simple yet strong.

Anette's first love is fashion and from an early age she wanted to be a dress designer, however her love of nature steered her to a career with flowers. A free spirit Anette's mission is to be an ambassador for the botanical world, elevating flowers and plants to art status. With showrooms in Herning, Denmark and Rome, Italy Anette leads a cosmopolitan life and whenever it's possible she studies art and design in other fields as she is convinced that to be a good floral designer one has to have a broader outlook, taking in other art forms and thinking outside the box.

Anette's design company www.aplusa.dk offers a range of creative solutions from styling for trend shows and photographers to offering business clients exclusive floral constructions and helping customers to celebrate by expressing their emotions through flowers. Story telling with flowers is what Anette is truly inspirational at.

Anette Østergaard

Steel Grass – Xanthorrhoea australis

SUNDRIES
Ivory OASIS® RAINBOW® Foam
Tank Glass Cylinder Vase

Design by Anette Østergaard

Wind Blown

Anette's summer design is structured to show off the elements of the arrangement in the simplest way, using the contrasting form of grass and ivory OASIS® RAINBOW® Foam Spheres to bring strong design qualities to the composition.

The skill in this design is the simplicity of the asymmetrical style, and Anette challenges florists to look outside the box and strip designs back to a freedom from mixture, just pure form and texture.

The OASIS® Floral Products Tank Glass Cylinder Vase is ideal for the transparent look Anette wished to achieve. Balls of ivory OASIS® RAINBOW® Foam make a compact and clever base for the long flowing lines of Steel Grass. Phalaenopsis Orchids give the arrangement a luxurious quality.

fresh designer tips

- Spheres can be sculpted from blocks of OASIS® RAINBOW® Foam.

Premier League

Rugby is a full on sport and the OASIS® Bioline® 3D Rugby Ball is the perfect point scoring design for sports fans.

Tough and durable the Rugby Ball is made with a sturdy plywood base. At full time it's a great final tribute for a rugger-loving supporter and made in the teams kit colours its grand for promotional events and a fun birthday gift.

You don't need to get into a scrum to follow Helen's easy step-by-step instructions for this try-scoring ball.

HOW TO:

Step 1
Soak the OASIS® Bioline® 3D Rugby Ball. Tease out the Finland Moss and glue in place with the OASIS® Floral Adhesive Tube. Leave the glue to go tacky before placing the

Finland Moss onto the plywood base.

Step 2
Cut the 'Stallion' Chrysanthemum stems to approximately 2 1/2 cm, insert securely into the floral foam making three densely packed

lines of Chrysanthemum in the centre of the ball. Push together the Chrysanthemum heads to form a uniform flat covering. Once the three lines have been completed spray the Chrysanthemum with Deep Blue OASIS® Spray Colour, giving an even coating.

Step 3
Use 'Feeling Green' Chrysanthemum to cover one side of the OASIS® Bioline® 3D Rugby Ball and white 'Stallion' Chrysanthemum to cover the remaining side. Again make the covering compact to hide the floral

foam underneath. Cut the stem ends of the Chrysanthemum diagonally for easy insertion into the floral foam.

Kick OFF

With soccer always a popular sport the OASIS® Bioline® 3D Football is surely the ideal product to score goals and show a florists versatility both for window displays, promotions and events.

Whilst the football design is a perfect funeral tribute for a sports enthusiast, it's a shame to keep it only for the final whistle. Playing a tactical game and selling the football for birthday celebrations and sporting events will put you in the Premier League.

The OASIS® Bioline® 3D Football stands on a sturdy plywood base that gives stability, plus the round shape is made from OASIS® Ideal Floral Foam which means the flowers will be easy to insert securely. Cover the plywood base with moss for a pitch like appearance and use flat-formed flowers such as Chrysanthemums or Carnations to give an even, uniform finish. Be a striker and attack the occasion by using favourite team colours to be sure you score the winning goal.

A STEP UP

Twenty-five years of marriage is becoming a rare occurrence these days so a silver wedding anniversary is something to celebrate.

Choosing a gift for married couples that have everything is tricky, so flowers are the obvious answer. The silver Porto Bag with Rope Handle sets the silvery theme of the gift with swathes of Organza Fabric to give the carriers masses of style and glamour. A clear Acrylic Designer Cube with a layer of OASIS® Ideal Floral Foam in its base will hold the Bear Grass firmly and give the Porto Bag rigidity.

Anette chooses a few luxury flowers to use in an innovative way by filling the Porto Bag with inexpensive Bear Grass, and then popping in luxury Cymbidium Orchids, held in Glass Test Tubes, to complete an alluring gift. Linking several glam bags together is a step up and a perfect recipe for quick and easy table designs for the silver celebration.

When inspiration fails...

Even the most seasoned professional florists have off days when inspiration is a dead duck, and just when you need a flash of brilliance the light bulb in the head switches off.

Sometimes it's churning out basic relay recipes that dims the enthusiasm and this is just when a little stimulation is needed. A flicker of a new idea or original technique is all that is required to get back on the design track. So look no further when inspiration fails for OASIS® Floral Products have a range of great DVD's to tempt the design buds into action. With eleven Baseline™ DVD's to choose from you will never be short of an idea again. The latest DVD's 'Essential Designer Techniques' and 'Inspirational

Techniques Volume 1' are packed with brilliant ideas to upgrade arrangements into modern commercial floristry. OASIS® Ambassador Richard Haslam works magic in his easy captivating style. Renowned the world over as a charismatic demonstrator, tutor and in-demand freelance designer, Richard is proud to present the stunning array of OASIS® Brand Floral Foams and quality floral products which are part of the OASIS® Floral Products range, weaving them into stunning arrangements.

Educational and fun these DVD's are an instant uplift to get the adrenaline going again.

Inspirational Techniques Volume 1

This has to be the greatest DVD to keep in the workroom and play when brainwaves are needed. Just to learn the three techniques of plaiting Kentia Palm, weaving Aspidistra and building Phormium rosettes alone means the DVD is worth every penny. Also there are fabulous modern arrangements from paradise garlands, woven pedestal arrangements, parallel designs and much, much more. To inject new looks into your repertoire of arrangements - get it now.

Essential Designer Techniques

Wondering how to use a new item from OASIS® Floral Products is a thing of the past after viewing this DVD. Explanations are simple and easy to follow; all plant materials are identified and named making the DVD a perfect way to introduce a junior florist to flower material and design. Don't keep it just for the juniors however, you will love the willow bound vase, smart chair back design and the clever use of OASIS® Ideal Floral Foam Spheres for corporate, wedding and event work, plus explanations of design techniques such as sheltering, cupping and zoning to mention a few.

DVDs are available to purchase now by calling 0208 408 0626 and online at www.thirdrockdesign.co.uk

A Star is Born

Whether it's a little Prince or a Princess a gift of flowers is the time-honored way of saying congratulations to the new parents. The gift design should shout boy or girl and be low maintenance so that new Mum's don't have to worry about finding vases or arranging the flowers. This is why an arrangement set in OASIS® Ideal Floral Foam is so perfect; all the new Mum has to do is top up with water and admire the flowers.

Princess

As pretty as a picture this butterfly arrangement is just perfect for a newly born Princess.

The Barbie pink 'Aqua' Roses are complemented by a baby pink Round Tinware Tub with Ears that is filled with OASIS® Ideal Floral Foam. Quick to make and stylishly girly this arrangement will certainly set the new Mum all of a flutter.

In-house gift sales can plummet when the summer holidays arrive and everyone has taken flight.

Thinking of ways to pluck sales out of the doldrums in innovative and inexpensive ways is essential to achieve target profits. Going green with the use of inexpensive foliages, natural Kraft Paper and simplistic rustic looks can pump up sales and increase your status as a forward thinking green florist.

In this hand-tied rustic design Anette makes a few special flowers look a lot with the use of soft greenery and flowing grasses. Thinking of foliage as part of the design rather than just filler between flowers will breath new life into greenery and designs. OASIS® Floral Products have a range of Kraft Paper in fashion colours to lift any natural design and the designer's favourite Bindwire will keep your hand-tieds firmly and securely bound.

Design by Anette Østergaard

on the Grapevine

Everyone loves the top selling Rustic Grapevine Wire, a natural wire that echoes the look of twigs and flower stems. Used alongside the OASIS® Biolit Ring with biodegradable base, this design is ideal for those who are eco-friendly as the base will disintegrate once the floral foam has been removed.

Oozing rustic charm, the Rustic Grapevine Wire can waft an individual design element into any arrangement. Striking Anthurium clavi leaves make a sensational covering for the OASIS® Biolit Ring. A tangled webbing of brown Rustic Grapevine Wire shields the Cymbidium Orchids that are tucked between the exotic leaves. Just get on the grapevine for distinctive designs.

FRESH THINKING

Innovative design ideas with customer appeal.

Helen Jamieson is a florist of today, fabulous design abilities and the all important business qualities that go with running a successful flower shop.

She knows that selling her designs are paramount to success and her shops Flower Design in Rowlands Gill and Whickham in Tyne and Wear are buzzing one-stop shops.

Here hot new trends in design set the pace, yet she does not forget the long-established customer who wants tradition with a twist. Everything is possible when you have Helen's design skills and business know how.

Strong diagonal lines set the tone for Helen's fresh thinking design. A study in contrasts, the delicate overlay of flowers softens the dynamic curtain of slanting black Willow Bundles. The OASIS® Raquette is cleverly rolled in sunflower seeds and sprayed with Flat Black OASIS® Spray Colour to give a rough textural interest to the base.

FRESH THINKING

Innovative design ideas with customer appeal.

Anette Østergaard's attitude to floral design can be summed up in one word – emotion.

In her heart there is a true love of nature that expresses itself artistically in her floral work. Anette's freelance business encompasses not only her native Denmark, but also Italy where she studies art and design, always seeking out new ways to express her feelings through flowers.

Not afraid to try something new Anette uses an OASIS® FOAM FRAMES® Designer Sheet for her Fresh Thinking arrangement, and deliberately leaves the green floral foam base showing. Nothing is hidden to give integrity to her designs.

A natural wind blown look is created with a meadow of Steel Grass interspersed with Prunus and Zantedeschia. Bringing the natural look of grasslands into the home and reinventing the use of floral foam is a revolutionary idea that is brave and contemporary, just like Anette.

CHAIN REACTION

It's not been a brilliant time for corporate work, when the recession first hit flowers were the earliest casualties.

Now businesses are on the up again, and it's time to jump-start those corporate accounts. It's easier to target known clients so don't be afraid to approach the commercial account customers you once held, giving them unmistakably stylish designs to wow them back to you.

Helen's design in an OASIS® Large Tall Glass Cylinder has all the ingredients to drive sales back. The strong outline of black Mitsumata and Willow Bundles together with the dramatic circles of Flat Midelino Coils will produce a chain reaction and can be used over and over again with different flowers and designs.

The time has come to get out into the market place once again and show the corporate sector the benefits of flowers created by professional florists.

IT'S A STICK UP

The exams are over; it's chill out time and what better way to congratulate success than sending this funky design to say well done.

Helen creates the perfect contemporary gift for fun loving students, and when price is a factor this smart arrangement looks super value for money.

Helen uses a base of OASIS® Ideal Floral Foam and then packs the Square Acrylic Bowl with turquoise and lime green Midelino Sticks, creating impact with their varying heights.

Threading single stems of flowers through the Midelino Sticks into the floral foam provides a secure and decorative anchorage. Use a water solution with OASIS® Floralife® Flower Food added to aid a longer life for the flowers.

CHANGING Shape

There was a time when Tulips were only available in the spring, but now they have an almost all-year season.

French Tulips renowned for their statuesque length approximately 50cm (20") are perfect for an entwined arrangement. The pared down look of only two elements Phormium leaves and elegant Tulips are characteristic of Anette's simple yet strong style of work.

The beauty of this design is that as the Tulips continue to grow they will change shape so an ever-evolving look will be created. Using a versatile 12" OASIS® NAYLORBASE® Posy Pad follow Anette's step-by-step instructions for a growing design.

FLOWERS AND FOLIAGE
Phormium tenax leaves
French Tulips - Cream

SUNDRIES
12" OASIS® NAYLORBASE® Posy Pad
4cm Steel Pins
OASIS® Floralife® Leafshine

Step 1
Soak the OASIS® NAYLORBASE® Posy Pad and drain excess water from it. Cut the Phormium leaves into pieces approximately 8cm in length. Pin the Phormium sections into place in a varying pattern making sure the slices of leaf overlap and cover the OASIS® NAYLORBASE® Posy Pad. Spray with OASIS® Floralife® Leafshine for a glossy look.

Step 2
Build up the Phormium by raising some sections on Steel Pin stilts to give a three-dimensional look. Start to add the Tulips swirling them around the outside of the base and inserting the stems firmly into the floral foam. Bend the long Tulip stems and secure with Steel Pins. If the stems are too turgid leave the Tulips out of water for a while to allow the stems to bend without breaking.

Step 3
Continue to add more Tulips building up the design to develop several layers of interest, and keep entwining the Tulips to create a domed shape. Don't forget to re-cut the stems with a knife to produce a sharp diagonal cut and push the stem firmly into the floral foam to aid security and longevity.

TEAM STRIP

Every football supporter the world over has a favourite team and with each squad having their own football strip it's woe betide the florist who gets the colouring wrong.

Football shirts are chosen as funeral tributes because of their significance to the deceased and are often requested with a name emblazoned on them or a preferred players identifying number added to the shirt. Producing football shirts in replica team colours, then adding a favourite players number means you will never be off side.

Supporting a local football team can be a public relations exercise for florists and the OASIS® FOAM FRAMES® Football Shirt can create eye catching window displays.

The OASIS® FOAM FRAMES® Football Shirt has a strong waterproof base with a depth of 5cm of floral foam to give secure support for the flowers. With indentations for the collar and badge the floral foam shirt takes the hard work out of making shaped designs.

Helen's classic shirt design complete with a raised Sisal number nine is edged with royal blue Poly Ribbon and covered with a textured base of Eryngium, then finished with cuffs of Gypsophila and a white Chrysanthemum collar.
